

RADIATOR COOLANT LONGLIFE SILICATE **FREE 50/50**

DESCRIPTION :

This is an anti-freeze solution, based on mono-ethyleneglycol and anti-corrosion additives in demineralised water. It contains no nitrites, amines or phosphates, neither borax or silicates and gives an excellent protection against corrosion, especially for aluminium parts. No deposit formation and easy to apply, the solution is already prepared.

APPLICATIONS :

Because of the low degree of saturation of the inhibitors, long drain periods may be applied.

SPECIFICATION LEVEL :

Exceeds the requirements of BS 6580-1992 and ASTM D-3306.
Recommended by Renault, GM, Ford, Caterpillar, etc.

TYPICAL CHARACTERISTICS :

Test	Method	Unit	Average result
Colour			Orange-red
Density at 15°C	D 4052	kg / m ³	1065
Protection temperature	D 1177	°C	-38
Water content	D 1123	%	52
Reserve alcalinity	D 1121	0,1N/HCl	10,2
pH	D 1287		7,3
